[Epaphrodis](#)

I have had the privilege of working with NETIS Rwanda for one year as a Technician of Fiber and LAN. During this time, I have gained extensive experience in the installation, maintenance, and troubleshooting of fibre optic and local area networks.

With 3 years of experience building highly scalable, maintainable, and cross-platform web and mobile applications using JavaScript, Typescript, Node.js, React, and React-native, I am a driven and enthusiastic professional. My strong background in software development, attention to detail, and innovative mindset allow me to deliver exceptional results. Collaborating effectively with colleagues and stakeholders, I have a proven track record of building solutions that meet business objectives and exceed customer expectations.

Experiences in my career so far

- Worked as a Technician in NETIS Rwanda. My experience at NETIS Rwanda has equipped me with a solid understanding of the technical and operational aspects of network solutions. I am committed to contributing to our team's success and ensuring that we uphold our reputation for excellence
- Recently worked as a Software developer at Codity dev. in Rwanda to build and maintain front-end web and mobile applications for clients. The technologies used are (React, JavaScript, and Typescript)
- Contributed to the Phantoms platforms as a full-stack software engineer intern at [Andela](#). The platform aims to facilitate people across Africa to use apps to locate bus movement and ask for a place on the bus. Technologies used include JavaScript/Typescript, Node.js/ExpressJS, React.js/Redux.js, MySQL, and Mongo DB.
- Worked as a software developer intern and Heal ID applications in [Maliyo Games](#)'s agile distributed remote teams and contributed to developing solutions that maximize impact and value to the organization. Leading technologies used: JavaScript, C#, and Unity design.
